FORTIUSONE, INC. HIRES IMAGE MATTERS, LLC.

NGA Award Winner to Architect FortiusOne Analysis Engine

WASHINGTON, DC (November 30, 2005) – FortiusOne, Inc. has hired Leesburg based Image Matters, LLC. to architect FortiusOne web based analysis and mapping tools. Earlier this month Image Matters was awarded the “2005 Innovations in Geospatial Intelligence Award” from the National Geospatial-Intelligence Agency.

Sean Gorman, FortiusOne President stated, “This award confirms our hiring decision to go with one of the best in the business. We look forward to working with Image Matters throughout our product development.”

ABOUT FORTIUSONE | <http://www.fortiusone.com> |

FortiusOne provides commercial and government clients with computational tools and consulting services to enhance physical infrastructure resiliency, security and the allocation of scarce resources. Benefits are realized in the areas of business continuity and operations planning, disaster response and recovery, and homeland security and defense. FortiusOne is unique in enabling customers to make ROI-based investment and deployment decisions when planning for and responding to business disruptions, natural disasters or terrorist events.

FortiusOne was spun out of George Mason University where FortiusOne founders conducted research on infrastructure security. While at GMU, Dr. Gorman was chosen as a Subject Matter Expert for the U.S. Dept. of Homeland Security’s Task Force on Critical Infrastructure Protection where his research was applied to evolving federal government and homeland security policies while helping make the business case for infrastructure security investment by the private sector.
