

Position Open: Software Developer / Programmer Analyst

Location: Washington D.C. Metro Area, Leesburg, VA

Job Description

Come join Image Matters LLC and help shape the Geo-social Web landscape. Known for our unique service frameworks and advanced Geo-social Web applications, Image Matters seeks top-notch Software Developers / Programmer Analysts to work in the Northern Virginia area. The work is challenging and very rewarding, with significant career advancement potential.

Image Matters is an innovative software technology and systems engineering services company that produces software products, develops advanced technology solutions, and provides consulting services to commercial and government clients. Image Matters offers career opportunities with unlimited job growth, a competitive compensation and benefits package, flexible schedules and a great working environment. Check us out at www.imagemattersllc.com.

Join our award-winning software development team to work with leading-edge Web and Geospatial technologies in a vibrant, creative, fast-growing business environment. We are seeking individuals who:

- Share our passion for technology and innovation,
- Enjoy tough challenges,
- Are fast-learners who wish to rapidly expand their sphere of influence,
- Wish to make a difference through commitment to high performance, integrity and customer satisfaction,
- Are team-oriented, with aptitude and desire to learn and contribute, and
- Are comfortable working in extremely agile, collaborative, user-focused environments.

Your responsibilities will include:

- Designing, developing, testing, and documenting software modules, components, applications and products as member of a collaborative development team,
- Proactively engage in architecture and design of products,
- Actively use best practices in design, coding, test, deployment and operations, and
- Supporting system engineering and system integration & test activities.

Skills

Skills our ideal candidate will have:

- A degree in CS, CE, EE, Math or equivalent experience and at least 2-5 years developing software applications in a professional (full-time) capacity,
- Must be proficient with Java programming and demonstrate knowledge of Java class libraries and basic computer science algorithms,
- Experience developing applications or Web-services (REST/SOAP) using the following technologies is a plus: J2EE, Spring, XML, JSON, Eclipse RCP, OSGi, AJAX, JavaScript, Flash, Swing, Hibernate, Lucene, SOLR, JDBC, and SQL,
- C# and .NET experience a plus,
- Excellent coding and debugging skills,
- Strong analytical and problem solving skills,
- Great listening skills,
- Collaborative team-player who can go solo if and when needed, and
- Positive attitude.

Company Description

Image Matters LLC is a rising star on the advanced Web technology scene. We have already successfully spun-out and launched an exciting new Social Web startup, www.smartRealm.com. Our people are stellar performers and proven innovators. If you want to make a difference, come join our employee-owned business and carve out your role in an exciting future.

Image Matters specializes in applications and technology for the Geo-social Web. We also offer a complement of professional services to apply our applications and technologies in support of clients in commercial, homeland security, environmental, defense, intelligence, and natural resource management markets. Image Matters LLC is privately held with its headquarters in Leesburg, VA. For more information about the firm, visit www.imagemattersllc.com.
